## Software Engineer

<https://github.com/mwakicodes>

Nairobi, Kenya

+254 745943954 • [mwakicodes@gmail.com](mailto:mwakicodes@gmail.com)

### Profile

Pro-active Software Engineer adept in delivering robust mobile & desktop software solutions that scale as needs & wants evolve. I thoroughly enjoy getting knee-deep in conception, design, development and production phases of software applications. I've worked in agile and continuous integration environments using modern-day tech stacks and task management tools to build world-class products.

I enjoy cycling during my off-screen time.

### Work Experience

Jul, '21 - Present

Remote

#### Mobile Apps Developer

Bytmatic Inc · Texas, US

Worked with the great team at Bytmatic Inc. to build [Traddit for Reddit](#) to an ever-growing userbase that we're all proud of. Here, I mastered collaboration across different time zones, as well as task management. I was tasked with the following:

- Developing architectural & design patterns to ensure seamless scalability
- Regularly implementing user feedback to ensure best possible user experience and usability
- Translating in-house designed mock-ups to UI while adhering to Material Design guidelines & iOS HIG.
- Supporting the development process by doing code reviews and contributing new ideas.

Jan, 2021 — Dec, 2021

Nairobi, Kenya

#### Mobile Apps Developer

Giglab.io · Nairobi, KE

Took a developer role at Giglab as we built Ssential and Sported. I was tasked with the following:

- Write unit-tests to ensure robustness and general reliability of code
- Continuously developing new time-critical features
- Continuously fixing time and financially critical bugs
- Implementing animations & theming to ensure the best possible user experience

## Education

Sept, 2018 — Present  
Nairobi, Kenya

### Bachelor of Science in Computer Science Africa Nazarene University

Currently studying core system engineering concepts at Africa Nazarene University. Acquired skills in System Analysis & Design, Design and Analysis of Algorithms as well as Artificial Intelligence.

## Skills

### TECHNICAL

- Dart, Flutter
- JavaScript, TypeScript, React
- Firebase
- MongoDB

### SOFT

- **Task Management** — Worked in teams to manage and prioritize objectives while using modern task management tools including Notion & Jira.
- **Collaboration** — Mastered fast & timely communication across different time zones which has always been a critical factor.
